

# St.Dennis Incinerator Group

## TELL CORNWALL COUNTY COUNCIL WHAT YOU THINK

Cornwall County Council are planning to make massive changes to the way it manages Cornwall's waste. This includes granting a contract to French company **SITA** worth millions of County tax payers money over a 30 year period.

They plan to build one mass burn incinerator in Mid-Cornwall and to construct 14 waste holding and sorting stations throughout the County.

The site chosen for the incinerator is **St.Dennis** and will be sited 500 yards from the village.

**STIG** believe that incinerating waste is not the best option for Cornwall and that the stockpiling of waste for collection and sorting leads to infestations of vermin and widespread smells.

**Do you want an incinerator built in St.Dennis or  
anywhere in Cornwall ?**
