Brenda,

The internet links were provided as .pdfs also, although we have in fact identified that one was missing as a .pdf. We therefore attach all of the pdfs forming Appendix G here. These should replace all the previous documents sent as Appendix G. The hard copies do not need amending.

Yours,

Chris Tofts

Chris -I have renamed the various pdf files for appendix G - best idea is to delete all the websites and existing pdfs in folder G and use these instead.

Nick

Chris

Mr Cahill has about 6 files that are internet links. One does not open and one does not quite look as provided in the hard copy - I haven't checked the others. What would be helpful would be to have pdf versions of what is actually wished to be presented. This also ensures that the internet documents are tied to a specific date and would be available even if the webpage was moved, removed or updated.

Would this be possible please?

The other documents of the Council's witnesses have all arrived safely thank you in both electronic and hard copy.

Brenda
